

## Sponsorship Opportunities

ICSA2022, *The 5<sup>th</sup> International Conference on Structures and Architecture*, which will be held at CREATE, Department of Architecture, Design & Media Technology at Aalborg University 6-8 July 2022 ([www.icsa20022.com](http://www.icsa20022.com)), provides a unique opportunity to share knowledge about the latest theories, tools, methods, and solutions intersecting structures and architecture:

ICSA conferences, organized by the *International Association of Structures & Architecture* (<https://www.structures-architecture.org>), is the world's leading and largest global conference series bridging the gap between Structures and Architecture. The conference brings together an interdisciplinary audience of researchers and practitioners worldwide with a background in architecture and in structural engineering. It includes architects, structural and construction engineers, builders and building consultants, construction industry persons, academics, researchers, students, product manufacturers, material suppliers, project managers and contract administrators, asset managers, government authorities of infrastructure development and others.

Through the critical framing, '*a viable urban perspective*', ICSA2022 stresses the commitment and responsibility of structures and architecture as drivers of a viable urban development hereby addressing the pressing global social, economic, and environmental challenges facing us. The research outputs presented at the conference are academic Research Papers supplemented by a new experimental research format entitled Critical Practices. This new format bridges research in academia by means of physical prototypes exhibited at the conference including a panel discussion facilitating further bridging of research in academia and research in practice. Furthermore, the conference facilitates a series of prominent keynote lectures, and a variety of associated events in the form of workshops and exhibitions. In addition to a number of general conference themes, 39 leading international researchers have formulated emerging research topics for a series of special sessions, mini symposia:

General Conference Themes: *Building envelopes/ Facades, Comprehension of complex forms, Computer and experimental methods, Concept architectural buildings / Futuristic structures, Concrete and masonry structures, Ecology of structures and architecture, Educating architects and structural engineers, Emerging technologies, Glass structures, Innovative architectural and structural design, Innovations in the use of natural materials, Lightweight and membrane structures, Special structures, Steel and composite structures, Structural design challenges, Tall buildings, The borderline between architecture and structural engineering, The history of the relationship between architects and structural engineers, The tectonic of architectural solutions, The use of new materials, Timber Structures, Urban structures and architecture.*

Mini-Symposia: 1:1, Tools and programs, Advances in wood construction, BE-AM on tour, Radical tectonics, Adaptive building envelopes, Structures and architecture of refurbishment

Special Sessions: The architecture and structure of Human Wellbeing, Infrastructure design and socio-ecological agency, Materiality in architecture and building design, Low-carbon low-waste structures, Integrated informed design processes, Bio design, Cellulose-based materials in structures and architecture, The future of bridges, Towards a robotic structuralism, Reimagining bureaucracy, Resilient built environment and communities; pre- and post-disaster

We have received over 400 abstracts for Research Papers from acknowledged researchers and practitioners across all continents and over 25 submissions of prototypes for the new experimental Critical Practice format calling for a highly qualified exchange of knowledge to go on at the conference.

**By participating as a sponsor, you have the opportunity to take part!**

Below we have listed the sponsorship options. If you are interested in sponsorship or have any other ideas for additional advertising exposure, please contact the conference secretariat: [icsa2022-secretariat@create.aau.dk](mailto:icsa2022-secretariat@create.aau.dk)

Best Regards  
Paulo Cruz & Marie Frier Hvejsel (Conference Chairs)

## Sponsorship Options

### GOLD SPONSORS – 5.000 Euro

- Promotional stand in the exhibition at the conference
- Full page promotion and company logo in the conference program
- Logo on the ICSA2022 sponsor webpage
- Large logo on banner at the conference
- 2 Registrations covering participation in the conference

### SILVER SPONSORS – 2.000 Euro

- Full page promotion and company logo in the conference program
- Logo on the ICSA2022 sponsor webpage
- Medium logo on banner at the conference
- 2 Registrations covering participation in the conference

### BRONZE SPONSORS – 1.000 Euro

- Half page promotion and company logo in the conference program
- Logo on the ICSA2022 sponsor webpage
- Small logo on banner at the conference
- 1 Registration covering participation in the conference
